

# Sunfilter

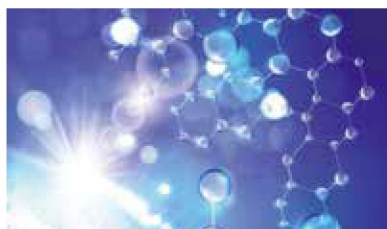

JUZVISION COATING-PHOTOCHROMIC

- ✓ Reduces HEV blue light
- ✓ Fast coating photochromic product
- ✓ 100% protection against UVA and UVB
- ✓ Available in all indexes
- ✓ Unique coating-photochromic technology

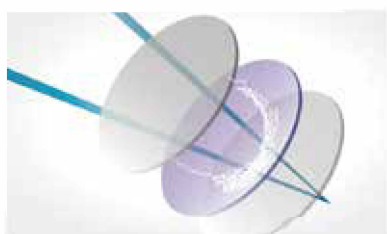

### ✓ New technology faster colour changing

Juzvision Sunfilter makes use of an advanced manufacturing process. Its sensitive colour-changing molecules instantly detect ultraviolet light giving you a fast changing visual experience along with a comfortable wearing experience.

The colour change is uniform and the fade back is fast. It is not affected by parameters such as lens luminosity and thickness, and the indoor and outdoor scenes are transition freely.

### ✓ Available in a wide array of materials

Juzvision Sunfilter can be applied to many lens material throughout the product range. With so many possible material, index and treatment combinations, Juzvision Sunfilter lenses satisfy diverse customer demands.

### ✓ All Weather protection, more peace of mind

Sunfilter effectively blocks UVA and UVB, protecting your eyes from strong natural and artificial light, especially for those who are sensitive to light. No matter whether you are indoors or outdoors, it can make you feel comfortable. It can give your eyes all-weather protection and let you enjoy every moment.

## When Technology Meets Speed

- Using a new generation of coating photochromic technology, the colour change and fading speeds are faster.
- Safety protection with excellent impact resistance.
- Effectively block UVA and UVB to protect your eyes.
- Multi-functional combination, UV++™, Hi-Vex™, giving you more choices.
